GLADIOLUS
 Mrs. Earl Dehnhoff

VANBUREN, OHIO

Mapleshade Farm is Two Miles East of Vanburen
 or One Mile South of Bairdstown
 North Baltimore Phone

Another year has passed by and with pleasure we again present our Gladiolus List for the new year. The Gladiolus is not only holding its own as the most satisfactory garden flower grown, but is fast increasing in popularity.

It is our ambition to raise and send out only good bulbs that we feel sure will do as well for you as for us. All varieties are tested and selected with care. Pleased customers have been our best advertisers.

The culture of Gladiolus is easy. Plant four to five inches deep on a sun-shiny place where the ground is well cultivated. Bulbs can be lifted in October and dried for a week. Store in a cool, non-freezing place.

Cut the flowers in the morning when they are fresh, and put in cold water. Change the water each day and slice off one-half inch of the stalk. The cooler the room the better they keep.

Orders are shipped as early in the spring as the weather permits. We fill orders generously as our customers know.

We extend to you a cordial invitation to visit the gardens during the flowering time which is from July until severe freezing weather.

Everything quoted is always sent postpaid.
 Size A—1¼ inch and up. Size B—¾ inch.
 12 bulbs at 10 times the single price.
 6 bulbs at 5 times the single price.

	A Each	B Each
ALBANIA. Large, wide open blooms of purest glistening white.	.06	.04
ALICIA. Tall, showy orange, light throat.	.08	.05
